Data Management Software by Mitutoyo

Measurement Data Network System

MeasurLink[®] is a measurement data management system based on databases (SQL Server). You can build a network to manage the measurement results and measuring instruments simply by combining the required functions.

MeasurLink[®] is a registered trademark of Mitutoyo Corporation in Japan and Mitutoyo America Corporation in the United States.

Measuring Instruments Shipped with Inspection Certificate

Mitutoyo guarantees product quality as a leading precision measuring instrument manufacturer and ships measuring instruments with an inspection certificate that includes inspection data so that customers can use them with confidence.

ABSOLUTE[™]

ABSOLUTE Linear Encoder

Mitutoyo developed the unique ABSOLUTE method to retain position information after the power is turned off.

The origin is set once - thereafter the live position is displayed when the power is turned on.

Height Gage

Linear Height SERIES 518 — High-performance 2D Measurement System

- This is a precision height gage featuring high accuracy and outstanding ease of use. It is useful not only in height measurement but also in a wide range of applications such as inspection of moulds and precision parts.
- Easy operation using keypad and touch screen navigation allows intuitive operation that is suitable even for beginners.
- The built-in scale is dirt-resistant and can be reliably used on shop floors.
- Various interfaces are available, including connection to a printer, a PC, and our wired or wireless communication system.
- Pneumatic full/semi-floating suspension system allows adjustment of air-cushion height.
- It is easily expandable to support various types of optional probes to meet your different measurement needs.

- Use in an environment that is as close as possible to 20 °C, and subject to minimal temperature change over time.
- *1: Indication accuracy and repeatability represent the values obtained when the standard $\phi 5$ stepped probe is used.
- *2: Guaranteed when using the Lever Head (519-521) and Mu-Checker (519-561).
- *3: 25% operation of vertical movement by suspension and motor
- *4: One battery pack (12AAF712) is provided as standard.
- *5: When ambient temperature is 30 °C or higher, the battery may not charge sufficiently.

LH Communication-Tool V1.0 software for creating inspection reports and configuring system settings

You can easily create and save inspection reports and configure device parameters.

- * Available at Mitutoyo website for free download.
- * To connect to a PC, use a USB cable (type A-B).

Adjustable to easy-to-see angle

Measurement guidance

Intuitive operation thanks to guidance

Home screen

Measurement menu display is easy to understand visually. The guidance makes it easy for first-time users to operate the system.

2D measurement - Pre-placement - This function allows the user to register the hole position of the workpiece before measurement.

Perpendicular/straightness measurement - Graph creation - You can check the measurement results of perpendicularity and straightness in real time during measurement.

Part program measurement

You can easily create, execute, edit, and even display the results of part programs.

Height Gage

QM-Height SERIES 518 — High-performance Height Gage

- This highly precise height gage is useful not only in height measurements but also in a wide range of applications such as measurement of steps, inside and outside diameters, and runouts.
 - Easy-to-view, simple control panel enables most measurements to be made with a single keystroke. SPC (Digimatic) and RS-232C data output allow easy data management with a PC.
 - Pneumatic floating models, which feature an air-suspension mechanism, can move smoothly on a surface plate (accuracy cannot be guaranteed for measurement while the unit is air-suspended).
 - It features a long continuous operating time of approximately 1,200 hours with four AA alkaline batteries.
- (Four commercially available NiMH/HR6 rechargeable batteries can also be used.)

*1 Indication accuracy and repeatability represent the values obtained when the standard ϕ 5 stepped probe is used. It should be used in an environment as close to 20 °C as possible, with minimal temperature changes. In the case of diameter, minimum (maximum) value, circle pitch or difference measurement, measuring errors may be larger than the accuracy ratings listed in the table due to variations in measuring force during a scanning measurement, which differs from height measurement.

*2 Indicates the value obtained from the measurement of a straight surface placed perpendicular to the the base reference surface using the Lever Head (**519-521**) and Mu-checker (**519-551**).

*3 Requires special communication driver. Consult your local Mitutoyo Sales Office for details.

*4 These can be downloaded from the Mitutoyo web site. <https://www.mitutoyo.co.jp/eng/contact/products/usb/index.html>

*4 When using a model with the air-floating system, it is advisable to use a JIS 1 class, or higher, surface plate. Using on surfaces with scratches or unevenness may prevent the system operating to the specified performance.

*5 The AC adapter cannot be used to recharge rechargeable batteries.

*6 Battery life depends on the operating conditions. In particular, it is more economical to use the optional AC adapter to power the instrument if the application requires prolonged use of the air-floating system.

Digimatic Height Gage SERIES 192 — Multi-function Type with SPC Data Output

Functions

- Origin-setting (ABS measurement mode): Any arbitrary value can be stored as the origin point.
- Zero-setting (INC measurement mode): Displayed value can be set to zero at any arbitrary position of the slider.
- Origin restoration: Previously set origin is restored when switching back to ABS mode.
- Presetting (ABS INC measurement mode): Displayed value can be set to any arbitrary value, including negative values.
- Measuring direction: Measuring direction can be switched at the press of a button.
- Data hold: Display value can be held. Reverts to ABS or INC mode when cancelled.
- Alarm: Error message is displayed when overflow or overspeed of displayed value arises and measurement is stopped.
- Data output: Allows integration into statistical process control and measurement systems. (Refer to page 09-3.)
- Fine and coarse height adjustment through knob and wheel combination. Slider height adjustment wheel allows fine and coarse height adjustment.
- Probe-tip diameter compensation: An adjustment is applied to the raw measurement data to compensate for the effect of the size of the spherical contact point used by the bidirectional touch-trigger probe.
- Presetting (2 positions): With two preset functions, two reference heights can be used relative to a surface plate.

- Double-column structure ensures stable measurements.
- Ergonomic base fits comfortably in the hand.
- Cannot be used with bidirectional touch-trigger probe.

Measurement example

Functions

- **Origin-setting:**
Any convenient reference surface, such as a surface plate, etc., can be stored as the ABSOLUTE origin point.
- **ABSOLUTE measurement:**
After power is turned ON, measurement can be started without zero-setting if origin-setting was previously performed. ABSOLUTE origin position can be changed by ORIGIN button.
- **Incremental measurement:** Allows origin setting at any arbitrary position. In this case, the origin point is not stored after turning off the power.
- **Data hold**
Display value can be held.
- **Data output:**
Allows integration into statistical process control and measurement systems. (Refer to page 09-3.)
- **Low-voltage alert:**
Low-voltage alert: If the battery voltage becomes low, a "B" appears in the display to alert the user before measurement is no longer possible so that the battery can be changed in good time.

ABSOLUTE Digimatic Height Gage SERIES 570 — Standard Model

- Simple design is easy to use.
- Scriber is provided as a standard accessory.
- When a dial indicator or dial test indicator is used with **570-227** and **244**, the dedicated holding bar (**953639**, overall length 50 mm) is recommended for use. However, MPE (Maximum permissible error) may be larger because the measurement point is further from the beam.

DIMENSIONS

Height Gage

Vernier Height Gage
SERIES 514, 506 — Standard Height Gage with Adjustable Main Scale

- Standard Vernier height gage. Fits comfortably in the hand and moves easily on the surface plate.
- Scriber is provided as a standard accessory.
- When installing a dial indicator or dial test indicator on **506-207**, ensure that the overall system can keep a good weight balance to ensure reliable measurement.
- The main scale slides and clamps within the column for quick and convenient zero-setting. (only for the **514** Series)

Height Gage

Height Gage Optional Accessories for Height Gages

Dial Test Indicators

- For information about the attachment of dial test indicators, refer to page 07-84.

Contact Sensor

900872

- This is a convenient sensor to be attached to both the workpiece*¹ and the height gage*², giving a lamp display when the scribe touches the workpiece.
 - *1 Conductive workpieces only.
 - *2 Attach to a conductive part.
- Magnet is incorporated.
- Battery (PR44, 2 pcs. required) is not included.
- Use it on a precision black granite surface plate. (Refer to page 01-51)

Center Probe

951144

- Allows quick measurement of center-to-center distance between holes.
- Measurable hole diameters: 1 to 38 mm
- Mounting bar section: 9x9 mm

Depth Gage Attachment

900764

- Attaches to a height gage for measuring groove and hole depth.
- Minimum hole diameter: 5.5 mm
- Maximum distance from the bottom of the holding bar to the contact point: 80 mm (metric type), 2.95 in (inch type)
- Dial indicator contact points are usable. (Refer to pages 07-63 and 07-64.)
- Mounting bar section: 9x9 mm
- Holding bar length: 100 mm

Typical applications

Checking accuracy of caliper (outside measurement)

Checking accuracy of caliper (inside measurement)

Checking accuracy of height gage

Optional Accessories

- **602162**: Wooden case for 300 mm, 12 inch model
- **602164**: Wooden case for 600 mm model

CERA Caliper Checker SERIES 515

- Designed to inspect calipers.
- Can also stand perpendicular to a surface for height gage inspection.
